## Datasheet

### Cooling Capacity

---

Cargo Box Temperature	0°C
Ambient Temperature	30°C
Cooling Capacity (ATP)	1350 W

### Heating Capacity

---

Heating Capacity	1070W
------------------	-------

### AirFlow

---

Nominal Operation	870 m <sup>3</sup> /h
High speed Operation	up to 1600 m <sup>3</sup> /h

### Recommended Box for Fresh Goods

---

Size of the box at K=0.7	< 8 m <sup>3</sup>
Size of the box at K=0.4	< 12 m <sup>3</sup>

### Weight and Size

---

Outer Unit (Condenser)	30 kg	781x870x265 mm
Inner Unit (Cargo Space)	10.5 kg	762x726x209 mm

### Power Supply and Consumption

---

Supply voltage	28 VDC (min 20VDC, max. 30VDC)*
Rated electrical power (cooling)	1150 W
City route: 5 Stops per hour	< 7% of the traction battery capacity

\*Supply voltage conversion packages available as options
